- Docker, Nginx, SSL (Basics)
- Google Developer Console
- OneSignal and Twilio Integration
- Microservices
- Go Lang (Beginner)
- Flutter-Dart (Beginner)

WORK EXPERIENCE

SOFTWARE ENGINEER

Wendorse

April 2021 - Present

- Developed android app BuboFeed in React Native and FastApi-Python (backend) and released on Google Play Store
- Implemented OneSignal for notifications and Twilio for sms service.
- Improved search query response time by implementing full-text search.
- Developed microservices (Python) for scraping latest movies, news and popular youtube videos.
- Designed a simple website bubofeed.com using HTML and CSS, and implemented bubofeed.com/blogs in WORDPRESS. Deployed the website on aws and protected with SSL using nginx and certbot
- Developed an admin-panel in React Js for editing contents in database.
- Implemented Redux for state management in React native. For data handling in backend used Redis and Postgresql

INTERNSHIP

March 2020 - April 2021

- Developed Static Site Generator using python and bootstrap5. Automated deployment to aws instance by using Github and Github Action.
- Created a TO-DO LIST web application using backend in Golang, frontend using bootstrap5, JQuery and Ajax and MySQL as Database

EDUCATION HISTORY

BTech in

Mechanical Engineering

Aug 2012 - April 2016

Govenment Engineering College - Thrissur
